SACCO Platform: Test Guide

Login details, current data, and sample data to enter for every module. Prepared 6 October 2026 against your local development database.

Keep this file private. It lists working passwords. They are development seed passwords for this test machine only. Never reuse them on a real deployment, and delete this file when you finish testing.

1. Before you start

What	Where / how
Staff login page	http://127.0.0.1:8000/login
Member portal login	http://127.0.0.1:8000/portal/login
Start the web app	From the project folder: `php artisan serve --host=127.0.0.1 --port=8000` (or `composer run dev`)
Start the ML scoring service	`C:\sacco_venv\Scripts\python.exe ml_service/run.py` from the project folder. Check http://127.0.0.1:8001/health shows `model_loaded: true`. Without it, scoring falls back to a simple rule-of-thumb score and says so.
Run the scheduler locally	`php artisan schedule:work` (the overdue scan is set for 01:00 daily)
Run all automated tests	`php artisan test --compact` (144 tests, all passing at the time of writing). ML tests: `C:\sacco_venv\Scripts\python.exe -m pytest ml_service/tests`

Do not run `migrate:fresh --seed` **unless you want a reset.** The seeder creates *random* member names and numbers each time, so the member tables in section 3 would no longer match your database. Everything you enter from this guide uses new members (MBR-9001 to MBR-9003) that will not clash with the seeded ones.

2. Logins

Staff (all use the password password123)

Email	Password	Role	SACCO	What it can do
`admin@fattech.ug`	`password123`	Super Admin	Platform (no SACCO)	Platform panel only: onboard and suspend SACCOs.
`grace@teachers.ug`	`password123`	Sacco Admin	Kampala Teachers SACCO	Everything in its SACCO: members, savings, loans, repayments, staff, reports, audit log, lending policy, portal access.
`peter@teachers.ug`	`password123`	Loan Officer	Kampala Teachers SACCO	Members, savings, loans, repayments. No staff page, reports, audit log, policy or portal access.
`david@farmers.ug`	`password123`	Sacco Admin	Jinja Farmers Cooperative SACCO	Everything in its SACCO: members, savings, loans, repayments, staff, reports, audit log, lending policy, portal access.
`amina@farmers.ug`	`password123`	Loan Officer	Jinja Farmers Cooperative SACCO	Members, savings, loans, repayments. No staff page, reports, audit log, policy or portal access.

Member portal

Login name	Password	Member	Notes
`m1923864`	`Portal2026x`	David Okello (MBR-9651), Kampala Teachers	Already enabled, and his password is already changed, so you go straight in. He declined credit scoring, so his consent page offers 'Allow my history to be used for credit scoring'. Works only while this database stays as it is.
`(issued by you)`	`(shown once)`	Any other member	A SACCO admin opens the member profile and clicks 'Enable portal access'. The login name (m plus 7 digits) and temporary password appear once. Section 4, module 10 walks through it.

3. What is already in the database

Two SACCOs, 16 members (each registered with data-processing and scoring consent), and three loans that are fully repaid. Savings balances are as at 6 October 2026.

ID	SACCO	License	Tier	Contact
1	Kampala Teachers SACCO	UMRA/SACCO/2026/001	Tier 2	+256 701 111222, info@kampalateachers.ug
2	Jinja Farmers Cooperative SACCO	UMRA/SACCO/2026/045	Tier 3	+256 702 333444, contact@jinjafarmers.ug

ID	Member no.	Name	Phone	SACCO	Savings (UGX)	Notes
1	MBR-9651	David Okello	+256 70 704 6924	Kampala	475,000	2 closed loans. Declined scoring. Portal enabled (m1923864).
2	MBR-7871	Faith Musoke	+256 78 829 7546	Kampala	620,000	1 closed loan.
3	MBR-9269	Dennis Nakitto	+256 77 648 6730	Kampala	275,000	
4	MBR-3146	Rose Mukasa	+256 70 788 6230	Kampala	800,000	
5	MBR-5850	Rose Mukasa	+256 77 508 3158	Kampala	350,000	
6	MBR-9844	Agnes Tumuhimbise	+256 78 850 3444	Kampala	670,000	
7	MBR-7132	Sarah Atuhaire	+256 78 092 0242	Kampala	250,000	
8	MBR-6574	Esther Kato	+256 70 053 9153	Kampala	220,000	
9	MBR-9898	Grace Byaruhanga	+256 78 446 6486	Kampala	350,000	
10	MBR-8345	Paul Musoke	+256 78 819 4511	Kampala	375,000	
11	MBR-1246	Simon Kato	+256 75 503 3024	Jinja	70,000	
12	MBR-6309	Agnes Musoke	+256 78 167 8340	Jinja	850,000	
13	MBR-8840	Moses Byaruhanga	+256 77 626 4477	Jinja	650,000	
14	MBR-5612	Simon Nabatanzi	+256 75 710 2826	Jinja	970,000	
15	MBR-2000	Ivan Kato	+256 75 312 7878	Jinja	750,000	
16	MBR-5524	Moses Nabatanzi	+256 75 351 7297	Jinja	320,000	

Loan	Member	Principal	Status
LN-2026-00001	David Okello	1,000,000	Closed
LN-2026-00002	David Okello	1,000,000	Closed
LN-2026-00003	Faith Musoke	500,000	Closed

4. Test cases with sample data

Run these in order: later modules use the members, savings and loans created earlier. Log in as `grace@teachers.ug` unless a step says otherwise. Dates must be today or earlier. Where a result depends on the ML score, it says *typical*: write down what you actually see.

Module 1: Foundation and multi-tenancy

ID	What to do	Enter this data	Expected result	Pass?
T1.1	Sign in as staff	Email grace@teachers.ug, password password123	Kampala Teachers SACCO dashboard.	[ ]
T1.2	Sign in with a wrong password	Email grace@teachers.ug, password wrongpass1	Stays on login; 'The provided credentials do not match our records.'	[ ]
T1.3	Sign in as platform operator	admin@fattech.ug / password123	Platform overview and 'Registered SACCOs'. No members, loans or savings screens.	[ ]
T1.4	Onboard a SACCO (as admin@fattech.ug: Registered SACCOs, then add)	Name: Mbarara Cattle Keepers SACCO License: UMRA/SACCO/2026/078 Tier: Tier 3 Phone: +256 703 555 010 Email: info@mbararacattle.ug Address: High Street, Mbarara City Admin name: Joy Tumwine Admin email: joy@mbararacattle.ug Admin phone: +256 772 900 100 Password and confirmation: Welcome2026!	SACCO appears in the list with its admin. Repeating the same license number or admin email is refused.	[ ]
T1.5	Sign in as the new admin	joy@mbararacattle.ug / Welcome2026!	Empty workspace. None of the Kampala or Jinja members are visible.	[ ]
T1.6	Isolation: sign in as david@farmers.ug, open Members, then browse to /members/1	david@farmers.ug / password123	Members list shows only Jinja members (MBR-1246 etc.). /members/1 (a Kampala member) gives 404.	[ ]
T1.7	Suspend a SACCO (as admin@fattech.ug), then try to sign in as joy@mbararacattle.ug	Use 'toggle status' on Mbarara	Joy is refused: 'Your assigned SACCO is inactive or suspended.' Switch it back on afterwards.	[ ]
T1.8	Add staff (grace: Staff and Users, add)	Name: Brenda Kyomuhendo Email: brenda@teachers.ug Role: loan officer Phone: +256 772 600 700 Password and confirmation: Staff2026pass	Brenda can sign in and sees no Staff, Reports, Audit Log or Lending Policy links.	[ ]
T1.9	Role limits: sign in as peter@teachers.ug and browse to /staff, /reports, /audit-log	peter@teachers.ug / password123	Each is refused (not shown).	[ ]
T1.10	Deactivate a staff user (as grace)	Deactivate Brenda, then try to sign in as her	'This account has been deactivated.'	[ ]

Module 2: Members and consent

Register these three members (grace: Members, Register). They are used in every later module.

Field	A: Juliet Nakabugo	B: Samuel Opio	C: Peninah Atim
Member number	MBR-9001	MBR-9002	MBR-9003
National ID	CF9101234567ABC	CM8805551234XYZ	CF9506667788QRS
Phone	+256 772 456 789	+256 782 555 123	+256 706 777 888
Email	juliet.nakabugo@example.com	(leave blank)	peninah.atim@example.com
Date of birth / gender	1991-03-14 / female	1988-07-02 / male	1995-11-20 / female
Occupation	Primary School Teacher	Boda Boda Transport Operator	Fresh Produce Market Vendor
Address	Kawempe Division, Kampala	Nakawa Market Area, Kampala	Kireka Trading Centre, Wakiso

Field	A: Juliet Nakabugo	B: Samuel Opio	C: Peninah Atim
Monthly income	1800000	750000	900000
Next of kin	Robert Nakabugo, +256 701 234 567, Spouse	Mary Opio, +256 700 345 678, Sister	Stella Akello, +256 701 888 222, Sister
Join date	2025-01-15	2025-02-10	2026-10-01 (very new: tenure under 3 months)
Consent: SACCO may use information	Tick	Tick	Tick
Consent: credit scoring	Yes	**No** (declines)	Yes
Next of kin informed	Tick	Tick	Tick

ID	What to do	Enter this data	Expected result	Pass?
T2.1	Register member A	All column A values	Profile opens; Consent Record shows Scoring 'Agreed', notice version 1.0, captured by Grace. NIN shown masked (first 4 and last 3 characters only).	[ ]
T2.2	Register members B and C	Columns B and C	Both created. B shows scoring 'Declined'.	[ ]
T2.3	Registration without data-processing consent	A new member, MBR-9099, NIN CF0000000001ZZZ, but leave the SACCO-information box **unticked**	Refused: the member must agree before registering. The scoring options are greyed out until the box is ticked.	[ ]
T2.4	Duplicate national ID	MBR-9098, NIN CF9101234567ABC, other fields any valid values	'A member with this National ID (NIN) is already registered in this SACCO.'	[ ]
T2.5	Duplicate member number	MBR-9001, NIN CF1234567890XYZ	'This Member Number is already in use within your SACCO.'	[ ]
T2.6	Other bad input	NIN: AB12 (too short); date of birth: a future date; income: -5	Each field is rejected with its own message.	[ ]
T2.7	Search	Type each in turn: Juliet, 772 456, MBR-9002, CF9101234567ABC	Each finds the matching member (the NIN search works even though the NIN is stored hashed).	[ ]
T2.8	Edit a member	Open Juliet, Edit: phone +256 772 456 790, income 2000000	Saved. The consent record is not editable here.	[ ]
T2.9	Deactivate and reactivate (grace)	Deactivate Peninah, then check Loans, new application	She is missing from the loan member list while inactive. Reactivate her afterwards. Peter does not see the button.	[ ]
T2.10	Change consent from the profile	Open Juliet, 'Update or withdraw consent': tick information box, scoring No, save; then set it back to Yes	Each save succeeds; the previous choice is kept in the audit log. Set her back to Yes before module 4.	[ ]

Module 3: Savings and contributions

Enter these for Juliet Nakabugo (Savings, Record). The balance after all five should be **UGX 1,000,000**.

#	Type	Amount	Method	Reference	Date
1	Deposit	300000	MTN MoMo	MM-77120045	2026-06-05
2	Deposit	250000	MTN MoMo	MM-77120188	2026-07-05
3	Deposit	250000	Airtel Money	AM-55120071	2026-08-05
4	Deposit	300000	Bank transfer	BT-2209-118	2026-09-05
5	Withdrawal	100000	Cash	(blank)	2026-09-20

ID	What to do	Enter this data	Expected result	Pass?
T3.1	Record entries 1 to 5	Table above	Each gets a transaction reference (SAV-2026-...). Final balance on her profile: UGX 1,000,000.00 (deposits 1,100,000; withdrawals 100,000).	[ ]
T3.2	Amount below minimum	Deposit 500	Rejected: minimum is 1,000.	[ ]
T3.3	Overdraw	Withdrawal 5000000 for Juliet	'Insufficient savings balance. Member has UGX 1,000,000.00 available for withdrawal.'	[ ]

ID	What to do	Enter this data	Expected result	Pass?
T3.4	Future date	Deposit 5000, date tomorrow	Rejected: date cannot be in the future.	[ ]
T3.5	Statement and receipt	Profile, 'Statement'; open any entry for the receipt	Statement lists the five entries. Receipt shows member, amount, method, reference, recorded-by. Print preview works.	[ ]
T3.6	Ledger cannot be edited	Look for edit or delete on any entry	There is none. Corrections are made with a new offsetting entry.	[ ]
T3.7	Savings for the others	Peninah (MBR-9003): none. Samuel (MBR-9002): deposit 200000, cash, 2026-09-10	Peninah stays at 0 on purpose: it triggers the loan-to-savings rule in module 4.	[ ]

Module 4: Loans and repayments

Interest is simple interest per year: **principal x rate/100 x months/12**. Both 'flat' and 'simple' give the same figure. For loan L1 below: 1,000,000 x 12% x 6/12 = 60,000, so the total to repay is **1,060,000**. A loan is overdue within 90 days after its due date and defaulted after that.

ID	What to do	Enter this data	Expected result	Pass?
T4.1	Apply: L1 for Juliet (Loans, New)	Member: Juliet Nakabugo Principal 1000000, rate 12, type flat, term 6 Purpose: Classroom materials business Applied: today Guarantor: leave blank	Loan created as Pending. Total payable 1,060,000. The page shows an ML risk score, a rule-engine recommendation and a plain-English reason. Typical: low risk, 'Recommend Approval' (ratio 1.0x of savings). Note the score.	[ ]
T4.2	Approve L1	Remarks: Approved per rule engine recommendation	Status Approved. Remarks are optional here because it follows the recommendation.	[ ]
T4.3	Disburse L1	Method: cash, date: today, reference: DISB-0001	Status Disbursed; due date is 6 months out; balance 1,060,000.	[ ]
T4.4	Repay in instalments	Repayment 1: 400000, cash, today Repayment 2: 400000, MTN MoMo, ref MM-55012233, today	References REP-2026-.... After the two payments: repaid 800,000, remaining 260,000, still Disbursed.	[ ]
T4.5	Overpayment	Repayment of 1000000 on L1	Refused: 'Repayment amount ... cannot exceed the remaining loan balance of UGX 260,000.00.'	[ ]
T4.6	Final payment	Repayment 260000, cash, today	Loan closes automatically: remaining 0, 100% recovered, status Closed.	[ ]
T4.7	Rule triggers: L2a for Peninah (no savings, new member)	Principal 500000, rate 12, flat, term 3 Purpose: Market stall stock No guarantor	Decision is at least 'Guarantor Required' (loan-to-savings and tenure rules; reasons are listed). A higher score may push it to 'Recommend Rejection'.	[ ]
T4.8	Reject L2a	Open L2a, Reject. Reason: Insufficient savings to support the requested amount.	Status Rejected. A reason shorter than 5 characters is refused.	[ ]
T4.9	Apply again with a guarantor: L2b	As T4.7 but Guarantor: Stella Akello, +256 701 888 222, Sister	Reason now says a guarantor has been attached. Still flagged by the rules.	[ ]
T4.10	Approve against the recommendation	Approve L2b with the remarks box empty, then again with: Approved by credit committee, sitting of 6 Oct 2026.	If the recommendation was not 'Approve', the empty approval is refused ('Record the reason for overriding it') and the second one works. If it was 'Approve', either works.	[ ]
T4.11	Member who declined scoring: L3 for Samuel	Principal 300000, rate 15, flat, term 4 Purpose: Motorcycle repairs Applied: today	No ML score and no recommendation. The page says 'Credit scoring declined by member' and an officer decides manually. The ML service gets no request.	[ ]
T4.12	Default detection: approve L3, then disburse in the past	Approve L3. Disburse: cash, **date 2025-12-01**, ref DISB-OLD-1	Due date 2026-04-01 (4 months). Today is more than 90 days past that.	[ ]
T4.13	Run the overdue scan	In a terminal: `php artisan loans:check-overdue`	Output shows L3: disbursed -> defaulted. Status becomes Defaulted; the dashboard's at-risk figures move.	[ ]
T4.14	Default history is permanent	Repay L3 in full (total 315,000), then view Samuel's profile	Loan closes, but his profile still counts 1 default (a repaid defaulted loan is still a past default).	[ ]

Module 5: ML risk scoring

ID	What to do	Enter this data	Expected result	Pass?
T5.1	Health check	Browse to http://127.0.0.1:8001/health and /model-info	'healthy', model_loaded true, champion logistic_regression, 8 features listed.	[ ]
T5.2	Score from the command line	`php artisan credit:score-member 2 500000` (Faith Musoke)	Table of 8 features, 'Connected (Python Microservice)', a risk score out of 100, band, and the risk drivers (score points per factor).	[ ]
T5.3	Scoring is blocked without consent	`php artisan credit:score-member <Samuel's id> 300000` (find his id on his profile URL)	Refused: 'declined credit scoring. No score was calculated.'	[ ]
T5.4	Fallback when the ML service is down	Stop the ML service (Ctrl+C in its window). Apply a small loan for Juliet: principal 100000, rate 12, term 3	Loan is still created. Reason ends 'the ML service was unavailable, so the score comes from the heuristic fallback.' Restart the service afterwards.	[ ]
T5.5	Scores respond to history	Score Juliet before and after T4.6 with `credit:score-member` (use her id, principal 500000)	Completed-loans count rises 0 to 1. Expect only a tiny change in the score. The model was trained on synthetic data, so this is normal.	[ ]

Module 6: Rule engine and lending policy

Defaults: approve below score 50, reject at 75 and above, loan-to-savings cap 3.0x, minimum tenure 3 months, past default does not auto-reject.

ID	What to do	Enter this data	Expected result	Pass?
T6.1	View policy (grace: Lending Policy)	No input	Shows the defaults above.	[ ]
T6.2	Invalid thresholds	Approve below: 40 Reject at or above: 30	Refused: the rejection score must be higher than the approval score.	[ ]
T6.3	Tighten the policy	Approve below: 10 Reject at or above: 70 Max loan-to-savings: 2.5 Min tenure: 6 months Reject on past default: tick	Saved (and written to the audit log as policy.updated).	[ ]
T6.4	See the new policy apply	Apply a loan for Juliet: principal 200000, rate 12, term 3	Typical: 'Guarantor Required', since her score is above 10. The reason cites the new 10.0 limit.	[ ]
T6.5	Older decisions do not change	Open L1 (closed)	Its recorded recommendation is unchanged.	[ ]
T6.6	Restore defaults	50, 75, 3.0, 3, untick reject on past default	Saved. Reject the T6.4 loan afterwards with reason: Test application withdrawn.	[ ]

Module 7: Dashboard and reports

ID	What to do	Enter this data	Expected result	Pass?
T7.1	Dashboard	Open Dashboard as grace	Today's savings, outstanding loans, at-risk (overdue and defaulted) figures, charts. After T4.13 the defaulted loan raises the at-risk figure.	[ ]
T7.2	Cross-check one number	Compare the dashboard's outstanding balance with the loans list	They agree (balance = total payable - repayments).	[ ]
T7.3	Exports	Reports: download savings.csv and loans.csv; open in Excel	Juliet's five entries appear in savings; every loan appears in loans. Values starting with =, +, - or @ are prefixed so Excel does not run them.	[ ]
T7.4	Printable summary	Reports: print summary	A clean printable page (save it as PDF from the browser print dialog).	[ ]
T7.5	Reports are admin only	Sign in as peter@teachers.ug and open /reports	Refused.	[ ]

Module 8: Audit log

ID	What to do	Enter this data	Expected result	Pass?
T8.1	Read the log (grace: Audit Log)	Search for savings.recorded, loan.applied, repayment.recorded	Entries show who, what and when, in order. Each has a hash.	[ ]
T8.2	Verify integrity	Click 'Verify Integrity'	'Integrity check passed' with the number of entries verified, and ledgers matching.	[ ]
T8.3	Verify from the command line	`php artisan audit:verify`	Both SACCOs print OK with their entry counts.	[ ]
T8.4	Override is recorded	Check the approval from T4.10	The approval entry carries the override flag when it went against the recommendation.	[ ]
T8.5	Log is admin only	Peter opens /audit-log	Refused.	[ ]

Module 10: Member portal (view only)

Use Juliet Nakabugo (who now has savings and a closed loan). Do the staff steps as `grace@teachers.ug` and the member steps in a **private/incognito window** so the two sessions do not interfere.

ID	What to do	Enter this data	Expected result	Pass?
T10.1	Enable portal access (staff)	Juliet's profile, 'Member Portal Access', 'Enable portal access', confirm	A yellow box shows a login name (m + 7 digits) and a temporary password, once. Copy them now: reloading hides the password.	[ ]
T10.2	Only admins can do this	Sign in as peter and open Juliet's profile	He sees 'Only a SACCO admin can change portal access.'	[ ]
T10.3	First sign-in (member)	Portal login page: the login name and temporary password from T10.1	You are taken straight to 'Change your password'. Other portal pages redirect there until you change it.	[ ]
T10.4	Weak and mismatched passwords	New password: abc12 (too short). Then new: Portal2026x, confirmation: Portal2026y	Each is refused with a message.	[ ]
T10.5	Set a password	Current: the temporary one. New and confirmation: Portal2026x	Overview opens.	[ ]
T10.6	Overview and savings	Open Overview and Savings	Balance UGX 1,000,000.00; five transactions with the references you entered; her details with a masked NIN. No edit buttons anywhere.	[ ]
T10.7	Loans	Open Loans	L1 shown as Closed: total 1,060,000, repaid 1,060,000, balance 0, with its three repayments. No risk score, recommendation, guarantor or internal notes.	[ ]
T10.8	Consent request (member)	My consent, choose 'Stop using my history for credit scoring', note: Please stop scoring me. Send	'Your request has been sent.' It shows as Waiting. Her consent still says Agreed (nothing changes yet). Sending the same request again is refused.	[ ]
T10.9	Handle the request (staff)	Juliet's profile: first 'Update or withdraw consent' (info ticked, scoring No, save). Then under 'Consent Requests From Member': note 'Scoring consent withdrawn as requested.', Mark processed	Request shows Processed by Grace. In the portal her consent now reads 'Declined' with the staff note. A loan application for her now gets no score.	[ ]
T10.10	Dismiss a request	Member sends 'Stop the SACCO using my personal information'. Staff click Dismiss with the note empty, then with: Please visit the branch to withdraw membership.	Empty note refused; with a note it is Dismissed and the member sees the note.	[ ]
T10.11	Member cannot reach staff pages	In the member window browse to /dashboard, /members, /loans	Each sends you to the staff login. Nothing is shown.	[ ]
T10.12	Wrong password lock-out	Six wrong passwords in a row on the portal login	A 'Too many sign-in attempts' message. The generic failure message never says which part was wrong.	[ ]
T10.13	Switch access off (staff)	Portal Access card: 'Switch off'	Her next page load in the portal returns to the login page, and signing in is refused until access is enabled again.	[ ]

ID	What to do	Enter this data	Expected result	Pass?
T10.14	Reset a password (staff)	'Reset password' on Juliet, then sign in with the old password	Old password refused; the new temporary password works and forces a change again.	[ ]
T10.15	Deactivate the member	Deactivate Juliet (profile)	Portal sign-in is refused even with the correct password.	[ ]

Scheduled overdue scan

ID	What to do	Enter this data	Expected result	Pass?
TC.1	List the schedule	`php artisan schedule:list`	'0 1 * * * php artisan loans:check-overdue' with the next due time.	[ ]
TC.2	Run it on demand	`php artisan schedule:test`, choose the overdue scan	The scan runs and prints the scan summary.	[ ]
TC.3	Proof it ran on schedule	After 01:00 with `schedule:work` running, open storage/logs/overdue-scan.log	A 'Scan completed' entry with that morning's counts. In production a cron job must call `php artisan schedule:run` every minute.	[ ]

5. Quick reference

Item	Value
Payment methods	cash, MTN MoMo, Airtel Money, bank transfer, other
Savings and repayments minimum	UGX 1,000 per entry. Withdrawals cannot exceed the balance; repayments cannot exceed the loan balance.
Loan minimum / term	Principal at least 10,000. Term 1 to 120 months. Rate 0 to 100 (% per year).
Loan status flow	Pending, then Approved (or Rejected), then Disbursed, then Closed. Overdue within 90 days after the due date, Defaulted beyond it.
Risk score	0 to 100, higher is riskier. It ranks members; it is not a probability. Typical members here score about 15 to 30.
Consent rule	A member is scored only if a consent record exists and scoring was agreed. Otherwise there is no score and an officer decides manually. Scoring consent needs data-processing consent.
ID formats	Savings SAV-2026-nnnnn, loans LN-2026-nnnnn, repayments REP-2026-nnnnn.
Reset to a clean slate	`php artisan migrate:fresh --seed` (wipes everything; member names and numbers change; portal logins are lost)

6. Notes for your results

Date	Test ID	What happened	Pass / fail
